

COST OF LIVING AROUND THE WORLD

The above chart is based on figures released by the International Labor Organization, one of the U.N. Specialized Agencies. The chart shows a comparison of the figure available to ILO in Geneva in January or February 1952 with the corresponding period in 1951.

World of Wheat

The Value of Reserve Moisture
This dry and hot spring was of considerable benefit to prairie farmers in as much as it enabled their grain unthreshed from last fall, that had remained under the snow all the winter, to be safely harvested. The dry spring also enabled seeding to be done at an early date. This has all been possible because the spring has been exceedingly dry. Ordinarily with such a small amount of rain as we have had from April 1 to date, the new young crop today would be suffering from lack of moisture, appearing withered and yellow, yet, on the contrary, it is still doing well and of good color. This is because the prairie enjoyed heavy rains last fall and last summer which built up reserves of moisture in the soil that the crop is now living on; thus demonstrating the high value of moisture stored in the land, particularly on summer-fallow. Experiments made, reveal that a summer-fallow crop has available about 14 1/2 inches of rain fall, 8 inches that falls from April 1 to July 31, with the rest conserved during two previous falls and the previous summer. It is obvious then that to conserve the greatest amount of moisture, summer-fallowing shall be done as early as possible.

ANNOUNCE ENGAGEMENT

Mr. and Mrs. A. C. Archibald wish to announce the engagement of their second daughter, Lorna Grace, to Edward Ross, second son of Mr. and Mrs. J. J. Jackson, all of Irma. The marriage to take place at the Irma United Church on July 23 at 2:30 p.m.

Don't forget the Sharon Ladies Aid and Lawn Social to be held at the home of Mr. and Mrs. Ralph Erickson on June 18. Supper will be served from 6 p.m. to 9 p.m. There will be some entertainment after supper.

Kinsella News

Mr. C. Brickman, constituency convenor, paid his annual visit to the Kinsella W.I. on Saturday afternoon. Almost all members were present and enjoyed Mrs. Brickman's talk on W.I. work in New Foundland.

Mrs. A. Loades was a visitor to the city during the week.

Mr. and Mrs. R. Niddrie of Edmonton spent the week-end at the home of Mr. and Mrs. F. Hajeck. Mr. Hajeck returned to Edmonton with them.

The high school boys' softball team and the winners at the sub local track meet, attended the track meet at Holden on May 31.

Others present at the graduation of Miss Mary Bilo at Vegreville were Mr. and Mrs. T. Oakes.

Mr. L. Pedersen spent the week-end at his home.

The staff of the Kinsella school attended the Teachers' convention at Holden on Friday, May 30.

Mr. Clayton Barker and daughters Audrey and Mrs. Murray Walker and son Barry Walker of Calgary were visitors at the home of Mr. and Mrs. Fred Manson of Villa during the week-end.

Miss Marilyn Peterson was visiting at the home of Mr. and Mrs. F. Jack of Irma last week.

Mr. Russell Mulawka of Edmonton is spending a few days at his home here.

The new school is looking very smart with its final coat of color wash.

Mrs. J. Hajeck of Viking was a visitor in Kinsella last week.

The Ladies Aid will meet on Thursday, June 5 at the home of Mrs. Clifford Lancaster.

Other visitors to the city last week were Miss F. Brown, Miss S. Carter and Mr. M. Rawluk.

Hobo Teas On the Increase

Hobo Teas are increasing in popularity and also in hilarity! The epidemic which began in the S.W.A. has now spread to the Junior group and many non-members are swelling the Hobo ranks. The Church coffers are also swelling and everybody is happy.

Maybe lightning never strikes twice in the same place but we know of cases where two contingents of Hobos arrived at the same place on the same morning demanding tea from the same hostess.

Then there's the case of ye local scribe who, last Friday, garbed in the worst pair of blue jeans that ever escaped the rag bag, was painting and calmsomning the living room with one hand and was wrapping bundles of Irma Times, sending two cartons of newly arrived chicks and scrubbing the floor with the other hand; yet managed to welcome a quartette for hobo tea with open arms.

Jarrow News

The sympathy of the entire community goes out to Mrs. Earl Burr on the death of her mother Mrs. Miller of Hardisty.

Mrs. Frieche is spending a few days with relatives in the city.

The Batts district is having its second round of measles in about two months. Gert Bragman, Jim and Bill Lingley and Jerry and Larry Mark being the victims this time.

Mrs. K. B. Lingley was an Edmonton visitor last week.

Mr. Michael, one of the old-timers of the Jarrow district passed away last Saturday in the Viking hospital. Sympathy goes out to the sorrowing relatives.

The W.A. will meet at the home of Mrs. Arthur Overby on Tues. June 10. Mrs. W. R. Meakins and Mrs. Overby hostess. Mr. and Mrs. Philip Robinson and Mrs. Howard Robinson of St. Paul, Minnesota, are visiting with Grandma Whidden and other relatives.

Master David Overby is a patient in the Viking hospital.

Glen-Coa Gleanings

Our sympathy at this time is extended to Mrs. B. Gulhaug and Mrs. L. Peterson whose father, Mr. B. Likness, passed away last Sat. at the Coronation hospital. The funeral was on Tuesday afternoon at 2 p.m. at the home of Mr. and Mrs. Philip Robinson. He had been in very ill health for the past year or more.

Mr. and Mrs. Ralph Erickson and Orville and Lawrence Likness attended the graduation and alumni festival of Camrose College last week-end. Johnny Erickson also arrived from Vancouver for the occasion. Evelyn Erickson was one of the graduates.

Miss Betty MacKay is giving her sister, Mrs. T. Larson, a helping hand for a few weeks.

Mr. and Mrs. T. Larson were Edmonton visitors during the first part of the week.

Mr. and Mrs. N. Fluevog and girls drove to Stettler last Sunday. Johnny Erickson was really taken by surprise last Monday evening when a number of his friends gathered to wish him the very best in his new venture. Johnny left for London, Ont., last Tuesday, where he has joined the air force as a pilot. John already has his own private pilot's license.

We trust no one was unduly put out at the strange church announcement in last week's column. We will try to be a "little" more accurate as to time from henceforth. The service will be next Sunday morning at 11 a.m.

Pastor L. Knudson was installed at Sharon as pastor of the congregations of Sedgewick Parish by the Rev. A. M. Vinje, Dean of CLBI last Sunday evening. Pastor Knudson's family will be moving from Margo, Sask., at the end of June.

Stock Disease Said Stamped Out

VANCOUVER—Dr. Thos. Childs, veterinary-general, said Monday that now there is no foot-and-mouth disease in Canada, there is no longer any danger of a new outbreak, and in a month Canada will officially announce this to the world.

Here to visit federal health of animals offices after a painstaking tour of Saskatchewan, Dr. Childs said in an interview:

"The cleanup of foot-and-mouth in Saskatchewan has never been equalled in the world. I consider our staff matchless."

He said the target date of Sept. 1 for reopening of the U.S. border to Canadian livestock "sounds reasonable" but he declined to commit himself further on the exact date.

He said the U.S. Livestock Sanitary Association, "the most powerful association of its type in the world," has put its stamp of approval on the job done. Test animals now were on farms which were infected.

Easterly Echoes

Mr. and Mrs. Eldon Fenton attended the graduation ceremonies held in Lamont Saturday and Sunday for the 1952 graduating class. Miss Elfrida Fenton, their daughter is a member of this class. Congratulations Elfrida and all the best for the future for you in your chosen profession.

Mr. and Mrs. Steve Thompson of Vancouver have been visiting at the home of their daughter Mrs. Phil Ink.

Miss Margaret Steele is home for her holidays from Calgary where she is in training for a nurse. Her chum, Miss MacDonald is holidaying with her.

Wainwright Lad Going to Cadet Camp In England

Chief Petty Officer Colin Carter of the Sea Cadet Corps, RCSCC Exeter at Wainwright, Alta., and youngest son of Mr. and Mrs. E. W. Carter, formerly of Irma, Alta., has been selected as one of a party of 24 cadets chosen from across Canada to attend the Empire Sea Cadet Camp to be held July 5 in England. Sea Cadets from all parts of the Commonwealth will meet in a group for two weeks at this camp and help tighten the ties of the Empire as only youth can.

Colin and P. O. James Crossen of RCSCC Warlord Edmonton will go to Montreal June 20. There they will meet with the rest of the Canadian Cadets at Camp Ewing, Chislehurst, Que. for four days. From Montreal they will fly to England where they will go on a tour before going to the Empire Camp July 5. On July 21 they will leave for Canada aboard the newly commissioned cruiser HMCS Quebec.

Colin joined the corps at Wainwright as a junior cadet and has steadily risen in ranks. Last year he passed both Leading Cadet and Petty Officer exams and was rated Petty Officer 1st class. That summer he was selected for the Leadership Course at HMCS Cornwallis, Nova Scotia, which was successful in passing. This entitles him to wear the coveted Quarter's Rating Badge. He also joins the Mackman and St. John Ambulance Badges. He has attended Sea Cadet camps at Lake Washburn, Alta., and at Camp Latona, B.C. At the latter camp he met one of the officers who will be in charge of the contingent, Lt. E. Colchester of RCSCC Vancouver, B.C., the other being led by Lt. E. Wilcox of Toronto.

A great deal of credit is due the Wainwright officers, Lts. J. Humphries, E. Wilson and H. Snyder for the very fine job they have done in training these young boys. The boys' parents appreciate their efforts very much.

Battle River FUA Picnic and Dance Friday, June 20

The Battle River Local FUA will hold their annual picnic and dance on Friday, June 20. The picnic will be at the old Paschenchale picnic grounds with the dance in the evening at the new Paschenchale school. 6-13c

Home Economist News Notes

By Bernice Reed, Home Economist Wainwright, Alberta

Six girls clubs in this district held their Achievement Days recently. The Achievement Day was to display the sewing that was done during the year and to have it judged. A program was planned for the entertainment of all visitors.

Each year there is chosen from each club an Efficiency Winner. The Efficiency Winner is the top girl in the club, 14 years old or more, who has not been to Club Week before. The girls from this district who win will be going to Vermilion School of Agriculture, June 8 to 12, along with all the boys and girls in Central Alberta who are Efficiency Winners. The girls who are Efficiency Winners this year are:

Paschenchale Pals—June Golding, Durness Happy Hobby Club—Margery Robertson, Chauvin Darners—Barbara McLeod, Paradise Valley—Beatrice Kragenes, Clondonald—Marion White, Streamstown—Rose Skoreyko. To machine hemstitch sheer cotton ruffles, draw the threads and drawn threads. Stitch on your machine—about 12 stitches to the inch—and push the hem to the bottom of the drawn threads.

THE EFFECT OF 2-4-D ON WHEAT

Ottawa, May 26—A three-year test at Morden Experimental station indicates that there are two periods in the growth of wheat when it is very susceptible to injury from an application of 2-4-D. The wheat was sown on summerfallow and all the plots were kept free from weeds as the purpose of the tests was to determine the effect on the wheat alone of applying 2-4-D at different growth stages of the crop.

The two stages of growth when wheat is susceptible to 2-4-D injury are: 1. when the wheat is from 2 to 6 inches high; 2. when it is in the boot or shot blade stage. The safe period for spraying wheat begins when the crop is six inches in height—this is about the 5 or 6 leaf stage—and continues until it is in the early shot blade stage. Spraying wheat with 2-4-D after it has reached the full shot blade stage does not injure this crop.

A serious reduction in the yield of wheat may be caused by spraying it with 2-4-D during the two unsafe periods mentioned above.

Women's Institutes Boost Cancer Fund

"The Women's Institutes deserve half the credit for the success of the northern Alberta Cancer Crusade at country points." That's the appraisal of campaign director Mrs. John Oliver, of Edmonton.

Mrs. Oliver points out that 125 individual campaigns are being conducted at district points, and fully half are in charge of W.I.s. At last report, the sum total of all the individual cancer campaigns in Northern Alberta was well over \$5 thousand dollars, within ten thousand of the objective.

The Cancer Society takes this, and every opportunity, to express appreciation for the co-operation of the Women's Institutes, and of provincial president Mrs. A. B. McGorman of Penhold.

Card of Thanks

I wish to thank the many friends and neighbors for their letters, also the lovely cards and flowers while I was in the hospital. Your thoughtfulness was very much appreciated. Many thanks to all.
—Mrs. A. Owen.

The Legion Sports Day seems to be bigger and better than ever this year. At time of writing it looks like a record crowd to us. The ball games are in full swing and everyone seems to be having a really good time. We will have the scores of all ball games and a full report for next issue.

A Valuable Service

THERE ARE FEW COMMUNITIES in Canada which have not received new citizens, arriving from other countries since the war. In that time over 500,000 immigrants have come from other lands and settled in our cities, towns and farming communities. There are many problems connected with assimilating so many people into the way of life of a new country where they have had to learn the language and many other things before they were ready to assume citizenship. Many individuals and organizations have assisted in the important task of helping these people to feel welcome in their new home and one organization which does a great service in this field is the Canadian Citizenship Council.

Helped In Many Ways

Although its work is not widely publicized, the council has done a great deal to help new citizens to prepare to become Canadian citizens. One project which it undertook was to interview more than 14,000 people of 17 nationalities, at a displaced persons camp in Germany and to provide prospective immigrants with information regarding Canadian citizenship and other important matters. It has published free guides to help new citizens, to learn the language and prepare for citizenship, and has made research grants for the study of problems related to the adjustment of immigrants to their new surroundings.

Is Important To The People

Such organized help and interest is of great importance to people who must cope with the problems of accustoming themselves to the language and customs of a strange country. In carrying out its work, the Citizenship Council has co-operated with other organizations in various parts of the country in giving help and encouragement to newcomers. It may be said that much of the success of Canada's present immigration scheme lies in the manner in which new citizens are assimilated into the population and helped to settle happily into their new environment. Great credit is due to all those who carry on this important work.

Large Sum To Be Spent Hunting Base Metals

REGINA.—About \$500,000 will be spent in northern Saskatchewan this year on exploration and development of base metals, mainly in the border area near Pin Flon, Man.

That district is the hottest claim-staking spot in Saskatchewan outside the Beaverlodge field in the northwest. Geophysical surveys and considerable diamond drilling are expected to continue this summer.

The \$500,000 estimate was made by Hon. J. H. Brockelbank, resources minister, in a review of the development in base metals expected this year.

While base metals will continue to play second fiddle to uranium, Mr. Brockelbank said there are definite signs of an "upsurge" in activity. Considerable prospecting is expected in the area south of Cree and Reindeer lakes in the Rottenstone and Churchill mining districts.

However, the expenditure of \$500,000 is estimated on the basis of the work programme planned for the three concessions and approximately 2,000 claims in the base metal areas.

Alberta Has More Than 3,000 Oil Wells

EDMONTON.—Alberta now has more than 3,000 oil wells, the petroleum and natural gas conservation board reported.

The board, in a report for the week ended May 15, said there were 3,003 wells in the province compared with 2,222 at May 7, 1951.

The Redwater field has 900 wells but the more-widespread and rapidly expanding Leduc field has 900 wells and may be the leader soon.

SLEEP TO NITE

EDICIN tablets taken according to directions is a safe way to induce sleep or quiet the nerves when tense. \$1.00 Brix Stores only or Sedalia, Toronto 2.

ANY NEW CALORIES? CHART JUST CAME MOTHER, WHAT ARE WE HAVING FOR DESSERT TONIGHT?

APPLE PIE, DEAR!

AW, FOURTH OF A PIE—ABOUT 500 CALORIES! BUT WE CAN'T HAVE THAT! PIE INTO ANOTHER!

LET'S SEE, ONE FOURTH IS TO 200 AS ONE SIXTH IS TO 200. OH, POOR! CHART, YOU CAN'T FIGURE OUT HOW MANY CUPS ARE IN A SIXTH OF A PIE!

I'LL JUST HAVE TO BAY A FOURTH!

—By Chuck Thurston

HOUSE-BUILDING BOOM

REGINA, Sask.—Building is in the midst of a house-building boom that promises to make this a record year in recent times. City officials expect that at least 500 houses will go up in the city this year. During the first 4½ months of the year, 220 permits were issued for houses. Almost 200 lots have been sold already this month.

Oil And Gas Finds Made Every Two Days

CALGARY.—Oil and natural gas discoveries in western Canada have been made at a record rate of about one every two days this year, according to figures released by Alberta's petroleum and natural gas conservation board.

During the first 4½ months of 1952 there were 54 indicated discoveries, more than 70 per cent. of them in Alberta. Twenty of the wells found oil or oil encouragement while 34 struck natural gas or wet gas.

Exploratory activity is high in northeastern British Columbia. Eight discoveries, seven gas strikes and one oil find, have been made to date this year. Saskatchewan has recorded seven discoveries, including four oil finds and three gas strikes. Crude oil production in Alberta for the week ended May 12 was up more than 36,000 barrels daily from the previous week.

Daily average production for the week amounted to 170,287 barrels, compared with a daily average of 134,061 barrels for the week ended May 5, and 122,414 barrels for the corresponding week last year.

Redwater accounted for most of the increases as its daily average jumped from 55,587 to 82,046 barrels, while Leduc production rose from 45,436 to 52,831 barrels daily. Production came from a total of 3,025 wells either producing or capable of producing, an increase of 22 over the previous week.

Nineteen new oil wells were placed on production in Alberta during the week ended May 12. The Leduc-Woodfield field accounted for nine of them. Two wells were completed as potential gas producers and 11 were abandoned as dry holes.

The over-all well completion figure in Alberta since the first of the year has been boosted to 521, including 310 oil producers, 35 potential gasers and 175 abandonments.

Funny and Otherwise

"I don't know what to think of you, Cohen. You bought a piano the other day on the installment plan; you paid \$10 down, and the next week you let them take it away. What kind of business do you call that?"

"Well, it cost them \$15 to move it."

"But what do you make out of it?"

"I made \$5. My son moved it."

"Father was delighted when I told him you were a poet."

"Yes, the last of my boy friends he tried to kick out of the house, was a boxing champion."

"These are hard times for actors, laddie."

"They certainly are. I must say you're looking very seedy, old chap."

"Seedy? I am so seedy I tremble every time I pass a canary."

A crowd had gathered round a man selling tins of corn-cakes. After a long speech he asked if anyone had bought a tin before.

A voice from the back of the crowd shouted, "Yes, I had a tin last week."

"Thank you, sir," said the salesman. "And did it do all I say?"

"Yes—and more. My wife used it to polish the furniture and it took all the knobs off the chest of drawers!"

He hid high for the parrot, and finally it was knocked down to him. Paying over his \$50, he asked: "Does this parrot talk?"

"Who do you think was bidding against you?" the parrot inquired.

Women can keep a secret just as well as men, but it generally takes more of them to do it.

The old panhandler ambled over to the bar, looking bent, weary and dejected.

A stranger standing there looked at him over. "You look bad, what's your trouble?"

"Oh, it's yoorz," the old man said. "I've got a bad case of yoorz."

"What's yoorz?" asked the stranger.

"A double Bourbon, thanks," the old man said straightening up.

HOUSE-BUILDING BOOM

REGINA, Sask.—Building is in the midst of a house-building boom that promises to make this a record year in recent times. City officials expect that at least 500 houses will go up in the city this year. During the first 4½ months of the year, 220 permits were issued for houses. Almost 200 lots have been sold already this month.

HONEST CLERK — A forgetful customer sent a pair of pants away to be cleaned by an establishment in Winnipeg and in so doing forgot to remove \$475 in cash which had been stowed away in one of the pockets. Upon discovering the money, Mrs. Hedwig Dennis, a clerk in the store, telephoned the customer long distance in Riverton, Man., who promptly came in and picked cash up.

SELECTED

Recipe

WHITE LAYER CAKE

2½ cups once-sifted cake flour
4 teaspoons Magic Baking Powder
¾ teaspoon salt
12 tablespoons shortening
1¼ cups fine granulated sugar
¾ cup milk
1½ teaspoons vanilla
4 egg whites

Grease two 8-inch round layer-cake pans and line bottoms with greased paper.

Preheat oven to 350 deg. (moderate).

Sift flour, Magic Baking Powder and salt together three times.

Cream shortening; gradually blend in 1 cup of the sugar and cream well.

Measure milk and add vanilla; very gradually blend about a third of the milk into creamed mixture.

Beat egg whites until stiff but not dry; gradually beat in remaining ¼ cup sugar, beating after each addition until mixture will stand in peaks.

Add four mixture to creamed mixture about a quarter at a time, alternating with sugar additions over remaining milk and combining lightly after each addition.

Add meringue to batter and fold gently until combined.

Turn into prepared pans.

Bake in preheated oven 30 to 35 minutes.

TOOK ADVICE. NOW WANTS MORE

EDMONTON, Alta. — A job-hunter ran the following advertisement in the classified section of a local newspaper:

"Back eat they say 'go west, young man.' Well I'm here. Now what?"

Mountain Snows Make Wonderland Of Alberta Prairie

(By The Canadian Press)

Mountain snows have made a wonderland of a 50-mile-long stretch of Alberta prairie lying between the Bow River on the south and the Red River on the north. Not so many years ago on all that discouraging approach to Calgary, 130 miles to the west, only one free grow—a cottonwood tree that was both landmark and joke.

Here was a problem, not for conservation, for there was nothing to conserve, but a question to be answered: what would nature do with that tract if given a hand?

Brooks, Alta., is the almost incredible answer, and for naturalists the town is the centre of a western wonderland.

Water was the one vital need of the tract and it worked the miracle. The region is now counted among the most productive in all western Canada. Crops of grain are opulent, trees grow in their thousands, flowers flourish, bird life is abundant and introduced ring-necked pheasants thrive. Wild rice, planted on a series of man-made lakes has attracted flocks of wild ducks.

The miracle-working water came originally from the melting snow and ice of Rocky Mountain slopes and valleys. It is this snow and ice that feeds the Bow River on which the C.P.R. built the great Bassano dam.

Water from the dam irrigates thousands of acres of once-desert land and irrigation is being extended in more areas of the tract more than a million acres in extent. Known as

Viriden Oil Well Produces 70 Barrels Daily

WINNIPEG.—Production at California Standard's Daly 15-1 oil well near Viriden officially has got under way, with the "black gold" being pumped at an estimated—though unconfirmed—rate of 50 to 70 barrels daily.

W. L. Ower, division exploration superintendent for the company, said this was "not spectacular," but was the best in the province thus far. Highest previous production was 40 barrels per day.

The well, one-quarter mile south of previous producers, produced at the rate of 120 barrels during monthly abating tests. Test figures generally are much higher than actual production.

Sold in hundreds of millions

"SALAM" TEA BAGS

Cookies—extra tasty when they're **MAGIC** baked!

OAT CRUNCHIES

Measure into bowl 3½ c. rolled oats and sprinkle with 4½ tps. Magic Baking Powder, ½ tsp. salt, ¼ tsp. grated nutmeg; mix thoroughly. Combine 3 well-beaten eggs, 2 tps. grated orange rind, ¼ tsp. vanilla; gradually beat in 1½ c. fine granulated sugar and add 1½ lb. butter or margarine, melted. Add egg mixture to dry ingredients and mix thoroughly. Drop by small spoonfuls, well apart, on greased baking sheets and centre each with a piece of nutmeg. Bake in moderate oven, 350°, about 15 mins. Remove baked cookies from pans immediately. Yield: 5 dozen cookies.

OUR COMPLETE SHORT STORY

I Cover The Police Courts

By SAMUEL CAMPBELL

Some People Just Don't Like Their Names in Newspapers.

WHEN I opened the door of my room and flipped on the light switch, I got a glimpse of the fat man sitting in a chair. He must have had a silence on the gun because I only saw two bright flashes. And then I sank to my knees. Somewhere in the back of my mind I was fondly wishing I had stuck to short story writing and kept my nose out of this seamy business. I cover the police courts. Yeah! Right now I'm covering six feet of this hospital bed.

It all began when the Journalism bug bit me. I thought I could write. So I went to the city editor of the newspaper and asked for a job. He assigned me to the police beat. I've been on it three years. And brother, if you're seriously thinking about writing as a career . . . but that's all beside the point. The character you want to know about is the fat man and why he used me for target practice.

On the morning of the day I was shot, I was sent to cover a narcotics story. For a while it was just routine stuff. Officers of the morality squad had caught the accused, a Jap-Canadian named Surika, hiding \$50,000 worth of opium in the rafters of

his garage. But the trial didn't go on. The fat man, Arthur Poole, acting on behalf of Surika, asked for an adjournment of one week. He said he wanted time to get Surika a proper counsel and an interpreter. The court granted the adjournment and freed Surika on \$3,000 bail . . . which the fat man paid. Then they both left together.

Well, there was nothing unusual about that. It happens every day in the courts. So I wrote the story up and went on with the next job. By noon hour I had quite forgotten the fat man and Surika until I was going down the city hall steps to lunch.

Suddenly the fat man came out of an alcove where he had been waiting for at least two hours, threw away his cigarette, coughed nervously and lumbered over to meet me. I saw he had something in his hand . . . money, I presumed. That was the usual approach. They say what respectable citizens they are and what a disgrace it would be to have their names appearing in a newspaper story—especially a court case. Well, that's exactly what Mr. Poole did, and I brushed him off the same way.

In the late afternoon, things were pretty slack. I got thinking again about the fat man and the Jap. There must be a human interest story somewhere in this set-up, so I looked up Surika's address and started out. He lived in a poor section of the suburbs in a wartime home. The history showed that he drank heavily and that his wife had left him about a year ago. No mention was made of the fat man or how he got tied up with him.

When I got there, it was raining slightly and getting dark fast. Just as I slipped from the rear door of the bus, I could have sworn I saw Poole getting on the front door. The collar of his trench coat was turned up and he was carrying a parcel . . . something wrapped up in newspapers. The bus pulled away quickly and I didn't get much of a look.

I went up to Surika's front door and rang the bell. No answer. "He must be around somewhere," I thought to myself. "Mr. Poole just left a few minutes ago." I went around to the side door. No luck there. Then I happened to glance down the yard towards the garage. There was no light on, but one door was slightly ajar. When I drew closer, I heard a car engine idling quietly.

"Surika! Surika!" I called out twice, but there was no answer. When I went in, I found out why. Surika was slumped over the steering wheel . . . dead! All the doors and windows were closed up tight. It looked like another of those carbon monoxide "accidents." And it might have passed for one if I hadn't seen the fat man leaving in such a hurry.

I broke a window in Surika's kitchen and got inside to a phone. I told the police where I was, what had happened, and who I had seen boarding a bus. Then I phoned in my story to the paper and went home. I think this is where you came in. Remember the two flashes and the silence on the gun? I dropped to the floor like a sheet of lead. The first slug went past me; the second grazed my left temple and knocked me out cold. But the fat man didn't get away. For even while I was on my way home on the bus, Homelid had secured a lead on him. They tailed him to my apartment and came in just behind me. He tried to shoot it out, but came out second best.

Just before he died, he signed a confession stating that he was the chief of the dope ring. Surika was only a small-time agent. That afternoon he had went to the Jap and asked for more opium. When Surika refused and threatened to expose him, the fat man knocked him out, propped him up in his car, closed the windows and left the motor running. Why he came to my place and took my wrath out on me, I'll never know. I guess some people just don't like having their names printed in the newspapers.

HELP NEWCOMERS

WINNIPEG—Canada's first gift to immigrants should be a "welcome" book in the newcomer's own language, crammed with facts about Canada and containing lessons in English, said Carl S. Carlson at a meeting here. He is chairman of the Winnipeg Kiwanis Public Affairs Committee.

LUNCH BOX SANDWICHES

School lunch box sandwich ideas lacking? Try chopped hard-cooked eggs mixed with crumbled crisp bacon, seasonings and mayonnaise. Use between buttered slices of whole wheat, rye, or pumpernickel.

Do You Know That . . .

When water has been heated to the boiling point (212 F.), the temperature cannot be raised no matter how much heat is applied, as long as the steam is allowed to escape. 2987

CUTE LIKE A FOX—These fox cubs, now a month old, are playmates of Dianne Guthrie, of Ancaster, Ont. Dianne's parents, Mr. and Mrs. K. A. Guthrie, recently received a gift of five fox cubs, and right now they're wondering what to do with the little fellows.

: Western Briefs :

Some Fast Painting

EDMONTON—A Canadian house-painting record was set here. Fifty Edmonton painters covered 1,200 square feet on a duplex bungalow in eight minutes and 18 seconds. The previous record was set last year in Winnipeg where a house was painted in 10 minutes and 32 seconds. The stunt was arranged by the Junior Chamber of Commerce to advertise beautification work.

Probably a Record

EDMONTON—A probable record was established here when Edward Hole graduated from the University of Alberta. He became the ninth member of one family to graduate from the same university. Eight

brothers and sisters preceded him. All are the children of Mr. and Mrs. Harry Hole of Edmonton.

Sheep Industry Threatened

VICTORIA, B.C.—Bands of killer dogs who have slaughtered up to 60 sheep in one night are threatening the British Columbia sheep raising industry with extinction, Wallace Gunn, provincial livestock commissioner, said.

Oil From Tar Sands

EDMONTON—Hon. N. E. Tanner, mines minister of Alberta, announced that the Swedish shale company intends to go ahead with experiments for a new process in extracting oil from the tar sands deposits 250 miles northeast of Edmonton.

Tornado Hits Alaska Town

FAIRBANKS, Alaska, 2. A small tornado roared through the suburban community of Good Hope, Fairbanks, Alaska, tearing roofs, looting automobiles, and scattering debris throughout the area. There were no reports of injuries.

Reduce Village Taxes

SEDCOVIC, Alta.—Village councillors here set a tax rate of 47 mills, down one mill from last year, including 22 mills for schools. The decrease was possible because of a reassessment completed during the past year.

Cat 28 Years Old

VICTORIA, B.C.—Qui Qui, Manx cat owned by Mr. and Mrs. Frank Hughes, now is in its 28th year. Hughes, equivalent to 140 years for humans. Qui Qui is in good health but spends most of the time under the kitchen stove.

Not On Menu

WINNIPEG.—Mrs. Rita Johnson had an unexpected extra course on her breakfast table recently. The entire ceiling collapsed, knocking her to the floor and spraying her two sons with fragments. They were not injured. A fire threat was averted when workers cut gas and power lines broken in the fall.

Prairie Folk Are "He-Men"

SASKATOON, Sask.—Prairie dwellers were characterized as "he-men" by Vice-Admiral E. R. Mainguy.

Explaining to a University of Saskatchewan audience why the prairie provinces had made a "vigorous" contribution to the navy, Mainguy said: "It takes a he-man to make a good sailor, and that is the kind of men that the prairies produce. The more of them we get, the happier we shall be."

Sound travels about 1,100 feet a second.

THE TILLERS

HA, HA, HA! THAT WAS A SWELL JOKE. MAYBE YOU'D HAVE TO SPRING IT ON MAM!

SAY MAM, WHAT'S THE DIFFERENCE BETWEEN A LIFE AND A LIFECARD?

Discoveries Near Flin Flon May Shed Light On History

FLIN FLON, Man.—Two discoveries made near here may shed additional light on the early history of northern Manitoba and Saskatchewan. The first find was made last fall when Frank Otaway, natural resources field officer here until a few weeks ago, uncovered an old camp site on the shore of Beaver lake, southwest of Flin Flon.

The second discovery was made recently when 60-year-old Errol Ford dug an ancient rifle barrel from the shore of Athapuskaw lake, southwest of here.

The location of the camp site on Beaver lake has not been revealed by the Saskatchewan government authorities in order that the area may be fully investigated before being disturbed by the general public. It is believed to be on the east shore of the lake within easy reach of the 35 highway.

According to reports square mounds show where cabins were located. In the corner of the mounds are heaps of rocks that once formed fireplaces. Near the locations are several depressions in the ground that indicate canoes were buried underground to save them from the winter's frost.

Although nothing definite can be obtained, it is reported five cabin sites have been located.

Further exploration is expected to be carried out this summer. Levelling the ground on the front of a summer camp lot at Blonnie's beach recently, Mr. Ford suddenly struck something solid with his shovel. Digging away six inches of earth he lifted out a rusted rifle barrel.

The barrel was 40½ inches long, very rusted and bent. It appeared to be a flintlock gun described as

those in use about the middle of the 19th century and is believed to have been made before 1850.

The gun appears to have been discharged by igniting powder by use of flint. A small hole about a half inch from the breach was used to place the powder behind the bullet and this was ignited when the hammer struck a piece of flint.

Radio Announcer Bit Off More Than He Intended

MUNDAN, N.D.—Radio announcer Jack Harris told his listeners he would do the laundry for whoever identified the author of the statement: "So much to do with so little time."

Mrs. Henry Hoppe phoned to say the quotation was that of Cecil John Rhodes, South African pioneer and the man whose will provided for Rhodes scholarships.

Mrs. Hoppe is the landlady for the Mandan Training school and its 300 inmates and employees.

In 1906 William the Conqueror made the last successful invasion of England.

Looks pretty - Tastes pretty WONDERFUL!

Fruit Bread—made with New Fast DRY Yeast!

Don't let old-fashioned, quick-spilling yeast cramp your baking style! Get in a month's supply of new Fleischmann's Fast Rising Dry Yeast—It keeps full-strength, fast-acting till the moment you bake! Needs no refrigeration! Bake these Kneady Fruit Loaves for a special treat!

KNOBBY FRUIT LOAVES

Scald 1½ c. milk, ½ c. granulated sugar, 2 tsp. salt and ½ c. shortening; cool to lukewarm. Meanwhile, measure into a large bowl ½ c. lukewarm water, 3 tsp. granulated sugar, 1½ tsp. salt and 1 envelope Fleischmann's Fast Rising Dry Yeast. Let stand 10 minutes, then stir well. Add lukewarm milk mixture and stir in 2 well-beaten eggs, ¼ c. marshmallow fluff syrup and 1 tsp. almond extract. Stir in 4 c. once-sifted bread flour; beat until smooth. Work in 2 c. seedless raisins, 1 c. currants, 1 c. chopped candied peels, 1 c. sliced marshmallows and 1 c. broken walnuts. Work in 3½ c. (about) once-sifted bread flour. Knead on lightly-floured board until smooth and elastic. Place in greased bowl and grease top of dough. Cover and set in a warm place, free from draft. Let rise until doubled in bulk. Punch down dough, turn out on lightly-floured board, and divide into 4 equal portions; cut each portion into 20 equal-sized pieces; knead each piece into a smooth round ball. Arrange 10 small balls in each of 4 greased loaf pans (4½ x 8½ x 4) and grease tops. Arrange remaining balls on top of those in pans and grease tops. Cover and let rise until doubled in bulk. Bake in moderate oven, 350° about 1 hour, covering with brown paper after first ½ hour. Spread cold loaves with icing. Yield—4 loaves. Note: The 4 portions of dough may be shaped into loaves to fit pans, instead of being divided into the small pieces that produce knobby loaves.

How "Skinny" Girls Get Lovely Curves

Gain 5 to 10 lbs. Now Pop

Thousands of girls who were once "skinny" before, now have lovely, plump curves. They have gained 5 to 10 lbs. in weight. They have gained 5 to 10 lbs. in weight. They have gained 5 to 10 lbs. in weight.

It takes from 50 to 100 years to produce a tree large enough for timber.

Grasshoppers cannot jump unless the temperature is at least 62 degrees Fahrenheit.

Members of the white race have more hair on their heads than any other race. They have an average of 50,000 hairs.

Locals

The United Church is holding an open air service in King's Park on Sunday, June 15. Everyone welcome.

Mr. and Mrs. Clarence Larson and family have left Colespur, Alberta, to make a new home at Edmonton.

Mr. and Mrs. A. P. Firkus are leaving shortly for a trip to Windsor, Niagara Falls and other points.

Mrs. J. J. Jackson is a patient in the Hardisty hospital. Her many friends here will be glad to know that she is having good progress.

Misses Josephine Saville and Joyce Larson of Edmonton spent the long week-end at the former's home here.

It's a dry year when even the weeds didn't come up. But the rains will come yet and the weeds, and perhaps more desirable plants will have their day.

Mrs. J. C. McKay left Edmonton by plane on Thursday last for Toronto where she will attend the convocation of the University of Toronto. Her daughter Miss Susie, will graduate there on June 6.

Word has been received of Mrs. McKay's safe arrival in Toronto.

Misses Wendy and Karen Johnson of Loughheed spent last week-end at Irma with their Grandmother Mrs. A. Owen.

Miss Lillian Mikkelsen visited at her home here recently before going on to Seba Beach.

Miss Evelyn Herder is going to B.C. for two months to assist with the fruit crops there.

Mr. and Mrs. Bob Maguire of Edmonton are the proud parents of a new baby son, a brother for Grey.

Mr. Emil Wirth is a patient in the Wainwright hospital.

Mrs. Timothy Donoghue arrived at Irma on Wednesday last from Flint, Mich. Mrs. Donoghue will visit here with Miss Annette and Mr. J. Donoghue and also with relatives in Sask. She plans to spend the summer on the prairie.

Quest Editorial

Teaching as a Career

By Dr. Stanley Clarke, Faculty of Education for Alberta School Trustees' Association

These are the days of big thinking: machines do the work, prices are high, oil makes us rich. Young people in Grade XI and XII hear of wonderful jobs "starting pay \$200 a month," and do some big thinking too. It is well to think again. Is there any possibility of promotion? Pay raises? Security of tenure? Is there a pension scheme?

Teaching as a career offers all of these. Initially teaching is not as well paid as are some of the competing jobs high school students hear about. In the long run, the successful teacher has more, even in the security and monetary sense.

Where teaching as a career has its real advantage is in what it does for you, and for the world. No other course of training concentrates more on some of the most urgent and important human problems, such as to how to get along with other people, and how to raise children into worthwhile and decent human beings. If you choose teaching as a career you are trained in these matters. Society recognizes the importance of teachers on the lives of its future citizens. That is why prospective teachers must have a good personality and a sound character. That is why they are given training in the factors which develop personality and character.

The teacher, as Voltaire was told, writes on the human skin. She

leaves her mark in the lives and beliefs and attitudes of her students. The farmer takes pride in a machine functioning perfectly. How much more pride is possible for the teacher, watching students become decent, upright and valuable citizens of the world of tomorrow!

In these days of big thinking, the biggest thing of all is still the human beings—who do the big thinking. The job of developing the right kind of human being is still the biggest job of all. This is teaching as a career.

FOR SALE—good registered Hereford bulls, one year old and quiet. Apply W. R. Askin, Irma. 6-13-20p

DOES SPRAYING PAY?

We got an excellent kill of insects with this National Sprayer.

I found that where I sprayed the winter wheat the yield was 10 to 15 bushels more than the piece I left.

I had a very heavy infestation of mustards with considerable other weeds and got very near 100% kill. I used the same solution of 2,4-D.

I am well satisfied with my National Sprayer. It is economical to operate and results are gratifying and many more well blades spraying such as pumpkins, water, out of basements, washing cars, radiators, etc. use of engine and trailer. A.P.

Taken from a few of many letters in our file... name and address on request.

Yes—definitely, say farmers who spray their fields with NATIONAL CHEMICALS used in NATIONAL SPRAYERS.

The combination of high quality, quick penetrating National 2,4-D and the low volume application possible with National sprayers means low cost spraying to you—as low as 30c an acre.

See your National Agent when ordering your supply of chemicals. You too will find that for concentrated killing power NATIONAL CHEMICALS are the best for your money.
